New because it comes from the future

Tired of hearing about how many complications there are for a job well done? Then choose Asteria: two steps is all it takes to yield excellent workability and aesthetic results.

Because Asteria does not come from the past, it comes from the future.
### BODY SHADES
The Body shades have excellent bonding ability with ease. Each shade features a micro-texture to avoid mismatching without the use of opaque or tracer shades. A 1-step shade tower with most natural dentition. The supplemental Body shade BL is recommended for high value bleached teeth and B3B is for yellowish teeth.

### Enamel Shades
The Enamel shades have compatible translucency as a substitute for natural enamel. The primary use of NE shade is for the anterior teeth and TE is for the posterior occlusal area. The supplemental Body shade TE is for highly translucent anterior teeth, and WE is for Whitish enamel and YE is for accessoro orangish enamel.

### Invisible Margins
ESTELITE ASTERIA introduces a new simplified 2-step layering concept. This comprehensive system is comprised of minimal shades:
- Just 7 Body shades and 5 Enamel shades cover the entire dental shade range.

### Superior & Long Lasting Gloss
The Supra-Nano Spherical filler in ESTELITE ASTERIA facilitates a very smooth surface with superior gloss that is easily obtained with polishing and is maintained long term.

### Gloss Retention
(Termal cycle 10,000 times)

### Simply Aesthetic
ESTELITE ASTERIA universal composite system is focused on simplified restorative therapy and outstanding aesthetic results.
